¹ The target 400 is based on review of previous targets (600) on RMAF. This was done in light of changes in the new basic education curriculum framework with an expectation of having 2 teachers per pre-primary school, one for pre-primary I and one for pre-primary II as opposed to earlier framework where we had 3 pre-primary levels with 3 teachers per school.

NB:

1. Based on programmatic adaptations, some indicators targets were revised while some indicators excluded in this project, this include exclusion of;

- # of parents/ caregivers reached through parenting program training (by Sex)
- # of ECD Centres with effective School Boards of Management (BOM) (by county) (Though collected data at baseline study)

2. All changes are as per last approved RMAF of January 29, 2020 - approved by GCC.

² Approximate male teachers' population in ECD is 10%
